

FORGED TRUCK WHEELS

ALEX FORGING PRODUCES THE WORLD'S BEST WHEELS

Material is one of the most important elements in producing high quality forged aluminum wheels. For more than 20 years, we have continuously studied and improved aluminum alloy, searching for the best combination of alloy materials to build forged aluminum wheels.

We invested in our own furnaces and extrusion equipment to develop stronger product material and increase quality control. 10,000 Tons of forging equipment, spinning machines and precision CNC production in house produce the best wheels in the world.

THE PRODUCTION OF FORGED ALUMINUM WHEELS HAS A NUMBER OF STEPS.

WHEEL FINISH OPTIONS

A-SHINE:
A-Shine finish wheels represent the pinnacle in truck wheel surface finishes. With all the luster and head-turning beauty of our Polished wheels, A-Shine takes this a step further by being less maintenance so your fleet can focus on delivering rather than maintaining.

The A-Shine finish bonds with the wheel material at a microscopic scale to ensure zero penetration of dirt, grime, water and other contaminants. Preserve the mirror-like look without the need for polishing

DIAMOND CUT MACHINED:
Diamond Cut Machined finish has 40% less machine line than traditional machined finish. Due to the high accuracy, wheels has been shaped and finished to exacting precision ensuring high performance and lasting beauty, smooth and difficult to observe machine lines, thus 30% less time to convert any side to a polished finish.

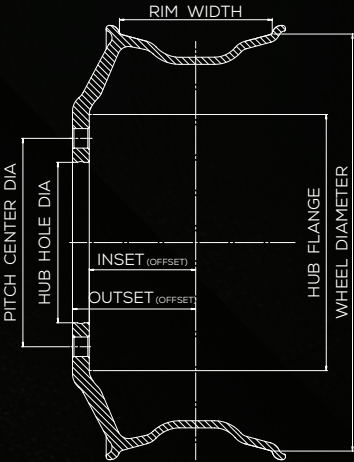

POLISHED:
Enhance the look,resulting in mirror-like brighter surfaces, our polishing process turns technology into art.

WHY ALEXRIMS FORGED WHEELS

LIGHT WEIGHT

Forged aluminum wheels are half the weight of steel wheels

SAFER & STRONGER

Alex aluminum forged truck wheels release heat faster and save tire brake life.

COST EFFECTIVE

Field proven to reduce fuel cost by more than 3-5%

SUPERB FINISH

Clean, bright wheels give your business a sharp image

NEW GENERATION A-SHINE

There's no need to go broke maintaining your wheels. Give your wheels a rinse with mild soap and water and your wheels will look good as new. Saving you time and money.

A-SHINE's protective polymers deeply penetrate the surface of your wheels retaining their luster while providing added protection against the elements.

No matter the road or weather conditions, **A-SHINE** will help preserve the high gloss shine of your wheels for years to come.
